## Hottest math teacher

Meet Oksana Neveselaya, the "World's Hottest Math Teacher" from Belarus

Pietro Boselli, also known as the "world's hottest math teacher," is a British model and engineer who has gained international recognition for his good looks and academic achievements. He was represented by Models 1 agency and won first place at the World Beauty Fitness & Fashion European ProAm event in 2014. Boselli has appeared in numerous modeling campaigns, including Abercrombie & Fitch, Equinox, Moschino, and Vogue magazine. He has also launched his own sportswear brand, Petra Design, and was featured on the cover of Attitude magazine. In 2016, he signed with Armani for their EA7 campaign and founded his own company, Petra Design. Boselli's lenticular cover in GQ Italia was later recalled due to a copyright lawsuit from the Galleria dell'Accademia. Boselli has been open about his passion for mathematics and engineering, and even holds a PhD in engineering from University College London. He has also spoken about his modeling career, saying he's "too good-looking to be taken seriously." Boselli's unique blend of academic achievement and modeling success has made him an internet sensation, with over 6 million followers on Instagram. In addition to his modeling work, Boselli has collaborated with brands like Logo TV and GQ Italia. He has also written articles about mathematics and engineering, showcasing his expertise in these fields. Despite his newfound fame, Boselli remains committed to teaching mathematics and inspiring young students.

Pietro Boselli: The World's Hottest Maths Teacher Redefined According to various sources, Pietro Boselli is considered one of the world's hottest maths teachers, who rose to fame through his stunning looks. Born on March 27, 2015, Boselli has been in the spotlight for his impressive academic background and his ability to break down stigmas surrounding mathematics and modelling. The Italian model and teacher has appeared on numerous magazine covers, including Attitude and Tatler Asia, showcasing his athletic physique and captivating personality. William has amassed an impressive following on Instagram, with 2,422 followers, and concurrently pursues a career as both a model and a teacher at the university. Nicholas Ferroni is highly regarded for his dedication to education reform and has been featured in People Magazine's "Sexiest Teacher Alive" series. Michael Bonner, an advocate for health and fitness, received recognition from various media outlets, including Ellen Degeneres' honor. Wemerson da Silva Nogueira, a science teacher in Brazil, worked in a high-crime suburb where he demonstrated remarkable commitment to his students. He initiated the social project "Young Scientists: Designing a New Future". To make his class more engaging, Wemerson organized field trips to research polluted mud and water conditions near Rio Doce. His students took samples, analyzed chemicals, conducted interviews with the community, and visited university labs. They found solutions to improve riverine conditions and implemented them. He made his students believe that school can transform their lives as well as the community. Wemerson is considered dynamic and creative in his teaching methods. The "Young Scientists" activities helped 90% of students escape the influence of drugs and crime. Today, his school is considered one of the best in the city, reducing drug trafficking and violence by 70%. Wemerson was a top 10 finalist for the Global Teacher Prize in 2017. Unicoos, Felix Beilharz and Jamel Fenner are three influential figures in education and online content creation. Unicoos won the Prize in 2017. In September 2015, Google chose him as the channel with the biggest social impact in Spain. His website helps students who can't afford specialized academies or private tutors access educational resources outside of class. Unicoos believes his videos are meant to supplement classroom teaching, not replace it. His content also benefits teachers looking to implement flipped classrooms. Dr. Chris Emdin, the U.S. Department of State's Minorities in Energy Ambassador, is also a prominent science advocate whose commentary on race, culture, inequality, and education has been featured in esteemed publications like the New York Times, Wall Street Journal, and Washington Post. With an impressive academic background that includes multiple degrees in fields such as Urban Education, Natural Sciences, Education Administration, Physical Anthropology, Biology, and Chemistry, Dr. Emdin is also a bestselling author of "Urban Science Education for the Hip-hop Generation" and "For White Folks Who Teach In the Hood and the Rest of Ya'll too." Meanwhile, Pietro Boselli, an Italian model and engineer born in 1986, made headlines at a young age after being discovered and modeling for Armani Junior. He also taught mathematics at University College London while pursuing his Ph.D. candidature. His unique blend of academia and modeling has led to numerous campaigns with American clothing retailers like Abercrombie & Fitch and Equinox, cementing his status as the world's sexiest maths teacher.
